SECURITY SCREENS

Barry & Paul
Bradshaw

Think of us as family

Safeway Security Screens is a family owned and operated business with over 40 years experience in manufacturing and installing security screen products in Perth. We promise to not pressure you into a decision. Our job is to provide you with the facts and then let you make an informed decision.

Barry & Paul

Australian Standards Compliant

All doors offered by Safeway Security are tested to the latest Australian Standards, 5039, 5040-1 and 5041. These standards ensure our doors are strong enough to withstand reasonable force, keeping your family safe and sound.

Tough Triple Locks

All hinged and sliding doors are fitted with Whitco triple locks for added protection and peace of mind.

Tamper Proof Fitting

We don't use cheap, easy to remove pop rivets. All external screws are stainless steel and tamper proof. Only licensed security companies have access to the tool required to remove the screws.

Xceed security screen doors and windows are made from an extremely durable perforated aluminium sheet and extruded aluminium frame using a patented fixing method. The result will exceed your expectations.

Renowned for both strength and durability, Xceed perforated aluminium products are corrosion resistant and act as a sunshade, making them ideal for coastal areas.

Xceed provides an affordable, yet practical and attractive security door and window solution. They afford you a modern look combined with solid home security at a price that will appeal.

Product Features and Benefits

- Reduce heat and glare
- Corrosion resistant
- A modern option to Diamond Grille
- Attractive and affordable

* Once a pet door is installed it no longer meets Australian Security standards and is considered a safety door.

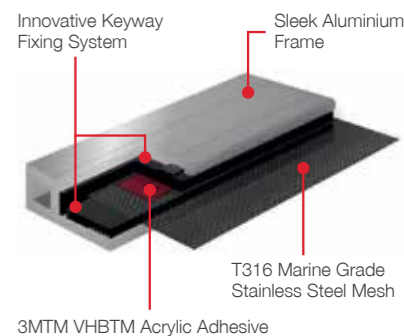

SecureView security mesh is made from 0.8mm 316 marine grade stainless steel, expertly woven in state-of-the-art facilities, and extruded aluminium frame using a patented fixing method.

Secureview is an excellent choice for its superb strength, durability and good looks. Sleek, precise lines integrate seamlessly with your home to maximise your view.

Providing maximum security without sacrificing your view or blocking out your breeze, you can be sure SecureView will meet your needs and exceed your expectations.

Product Features and Benefits

- Enjoy clear unobstructed views
- Maximum strength and durability
- Patented innovation
- Resistant to corrosion, embers and flying debris

Interest Free Payment Terms

We accept Cash, Cheques, Credit Cards, or Direct Deposit. Payment is due upon installation.

Convenient Installation

Your satisfaction with our product is what we strive for and we want you to feel completely confident in your decision. To ensure total satisfaction, our licensed security installers are happy to arrange installation at a time most convenient for you.

Diamond Grille Security Doors

Diamond Grille, also known as SW07 Grille, is a tried and proven product. It's been a popular security door for decades. Tens of thousands of Australian homes rest easy with the protection of Diamond Grille security doors.

Instead of flywire, Diamond Grille can also be fitted with Pet Mesh. Pet Mesh is a wire mesh fine enough to keep bugs out, yet strong enough to handle pets jumping up against it.

Benefits of security doors

Improve security

The main purpose of installing a security screen door is, of course, to beef up your Perth home's security!

Maintain privacy

Custom-built security doors enhance the privacy in a property, thanks to perforated aluminium mesh screens. Have peace of mind knowing that these extra measures prevent strangers from having a direct line of sight into your home.

Deter burglars

Burglars avoid homes that are difficult to break into. That is why adding another set of doors to your property, like security screen doors, will make them think twice about breaking and entering.

Keep children and pets safe

Adding security screen doors is a great way to keep your home light and airy without worrying about toddlers or pets running out onto the street.

Increase natural light and ventilation

When the weather is humid, you want as much fresh air to flow into your home as possible. And if you don't have big windows, then keeping your door open can add natural light into your home.

Add value to your property

Any configuration that enhances security adds value to a property. So if you have plans of selling your home someday, you'll get a return on investment from installing quality security screen doors.
